PROFESSIONAL SUMMARY

Results-driven Software Test Engineer with 5+ years of experience in manual testing, Playwright automation, and AI-assisted testing across e-commerce, logistics, and on-demand service domains. Skilled in designing robust test strategies, identifying critical defects, and improving product quality through automation and intelligent testing approaches. Hands-on experience with Playwright (TypeScript), REST API testing, SQL validation, and AI-based testing techniques for modern web applications. Strong expertise in Agile environments, CI/CD testing, and automation framework design. Proven ability to reduce manual effort and increase test coverage using Playwright automation and AI-powered tools.

TECHNICAL SKILLS

Testing Expertise

- Functional Testing
- Regression Testing
- Smoke & Sanity Testing
- System Testing
- Integration Testing
- UI Testing

AI Testing

- AI-assisted test case generation
- Self-healing automation concepts
- AI-based locator strategies
- Intelligent defect prediction
- Microsoft Copilot
- LLM Tools (ChatGPT, Claude, Grok, DeepSeek, Perplexity)

Database Testing

- SQL Queries
- Data Validation
- Backend verification

Languages

- TypeScript
- SQL

API Testing

- REST API Testing
- Postman
- API validation and response verification

Automation Testing

- Playwright with TypeScript
- Automation Framework Design
- Cross-browser automation
- Data-driven testing

Tools

- Playwright
- JIRA
- Postman
- TestRail
- Git / GitHub
- ClickUp
- Confluence
- Visual Studio Code
- Prisma
- DBViewer

Methodologies

- Agile Scrum
- STLC
- SDLC
- Defect Life Cycle

PROFESSIONAL EXPERIENCE

Software Tester

ShypBUDDY Logistics Aggregator (e-Commerce) – Mumbai

July 2024 – March 2026

ShypBUDDY is a multi-carrier logistics aggregator platform enabling businesses to compare, book, and manage shipments across multiple courier partners, with integrations for Shopify, WooCommerce, EasyEcom, and Open API.

Responsibilities

- Analysed project requirements; authored test scenarios, test data, and detailed test cases.
- Carried out sanity, regression, re-testing, and unit testing across each sprint cycle.
- Verified REST API request/response integrity and backend business logic using Postman.
- Validated backend data accuracy and integrity using Prisma and DBViewer after each deployment.
- Raised, triaged, and tracked defects in ClickUp; followed up with developers for timely resolution.

- Led a QA sub-team of 3 members, coordinating daily assignments and on-time delivery of test deliverables.
- Participated in daily Scrum ceremonies; collaborated with frontend and backend teams before each release.
- Oversaw the UAT sign-off process upon successful completion of all testing phases.
- Leveraged Agentic AI, Gen AI, and n8n Workflow Automation to automate multi-step QA tasks and enhance test coverage.
- Applied Microsoft Copilot and Prompt Engineering to generate test cases, bug reports, and edge-case scenarios from LLMs.

Manual Tester

Techshack Pvt. Ltd. – SPEEDYY (On-Demand e-Commerce App) – Mumbai

Sep 2023 – Feb 2024

SPEEDYY is an on-demand multi-service application for food, groceries, and pharmaceuticals, operating across Android, iOS, and Web with real-time order tracking and personalised recommendations.

Responsibilities

- Conducted end-to-end manual testing across Android, iOS, and Web platforms.
- Designed and executed functional, regression, sanity, and exploratory test cycles for new feature releases and defect fixes.
- Verified critical user flows: order placement, real-time delivery tracking, payment integration, and personalised recommendations.
- Maintained test cases in TestRail, captured requirements in Confluence, and raised defects in JIRA; participated in Agile sprint planning and retrospectives.

Junior Manual Tester

eZest Solutions – SKECHERS (B2C e-Commerce Web Platform) – Pune

Apr 2020 – Aug 2023

Skechers is a B2C e-commerce web application providing customers with a seamless online shopping experience for footwear, clothing, and accessories.

Responsibilities

- Tested key shopping flows: product search and filters, cart management, checkout, payment gateway, and promotional discount logic.
- Performed functional, regression, and exploratory testing to ensure a seamless and reliable purchase experience.
- Built and maintained automation test scripts using Selenium WebDriver, TestNG, and Maven to improve test coverage and reduce manual effort.
- Logged defects in JIRA, managed automation scripts in GitHub, and collaborated with developers during sprint cycles to confirm bug fixes.

KEY ACHIEVEMENTS

- Reduced manual regression effort by 40% through Playwright automation.
- Improved test coverage by automating critical business workflows across multiple projects.
- Identified high-severity production defects before release, significantly improving application stability.

EDUCATION

Bachelor of Arts (B.A.) | 2008 – Karmveer Bhaurao Patil College, Kopergaon | Pune University

CERTIFICATION

ISTQB Certified Tester – Foundation Level
